

Current Emissions Reporting

Reporting Year: 2025

EMISSIONS	TOTAL (tCO ₂ e)
Scope 1	0
Scope 2	0.23
Scope 3 (<i>Included Sources</i>)	Upstream transportation and distribution – 6.33 Waste generated in operations – 0 Business travel – 21.89 Employee commuting – 0.73 Downstream transportation and distribution – 0.24
Total Emissions	29.42

Emissions Reduction Targets & Variance

To continue our progress toward Net Zero, we have adopted carbon reduction targets.

Why gross emissions increased in 2025: As a growing SME, our total footprint increased this year. This was expected and is due to three clear business factors:

- 1. Full Year of Operations:** Our 2024 baseline only contained 3 months of active marketing travel (Oct-Dec). 2025 represents our first full 12-month commercial year.
- 2. Team Expansion:** We hired an additional field based Account Manager to support NHS sales, and Medical Scientific Liaison which naturally increased business travel.
- 3. New Product Launch:** We launched four new product lines in 2025, which increased the volume of stock imported into the UK (Upstream) and distributed to wholesalers (Downstream).

Despite this business growth, our carbon intensity (emissions per employee and per pack shipped) remains highly efficient.

Carbon Reduction Plan

Supplier Name: Infectopharm Ltd (UK) **Publication Date:** July 2026

Commitment to achieving Net Zero

Infectopharm Ltd (UK) is committed to achieving Net Zero emissions by 2045. (Previous updates can be found at: <https://www.infectopharm.co.uk/wp-content/uploads/carbon-reduction-plan.pdf>)

Baseline Emissions Footprint

Baseline Year: 2024

Additional Details: The company was incorporated in February 2024. As an SME, our first year of recording data was 2024. This baseline only represents a partial year of operations, as active product marketing did not commence until October 2024.

Baseline year emissions: 2024

EMISSIONS	TOTAL (tCO ₂ e)
Scope 1	0
Scope 2	0.23
Scope 3 (Included Sources)	Upstream transportation and distribution – 0.88 Waste generated in operations – 0 Business travel – 13.42 Employee commuting – 0.73 Downstream transportation and distribution – 0
Total Emissions	15.26

Carbon Reduction Projects

The following environmental measures were implemented in 2025 to reduce our carbon footprint:

- **Greener Fleet:** We successfully integrated Electric (EV) and Plug-in Hybrid (PHEV) vehicles into our field sales team, preventing thousands of miles of standard petrol/diesel emissions.
- **Efficient Logistics:** We tracked our 3PL and freight data, confirming our distribution network operates at a highly efficient carbon-per-unit ratio.
- **Digital Working:** We actively use online meetings where possible to reduce unnecessary driving and flights.
- **Paperless Office:** We strictly monitor our office consumables, committing to a "print less" environment
- **Hybrid Working:** Office based staff work from home 1-2 days of the week.

Declaration and Sign Off

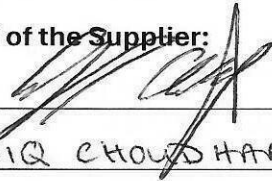

This Carbon Reduction Plan has been completed in accordance with PPN 06/21 and associated guidance and reporting standard for Carbon Reduction Plans.

Emissions have been reported and recorded in accordance with the published reporting standard for Carbon Reduction Plans and the GHG Reporting Protocol corporate standard and uses the appropriate Government emission conversion factors for greenhouse gas company reporting.

Scope 1 and Scope 2 emissions have been reported in accordance with SECR requirements, and the required subset of Scope 3 emissions have been reported in accordance with the published reporting standard for Carbon Reduction Plans and the Corporate Value Chain (Scope 3) Standard.

This Carbon Reduction Plan has been reviewed and signed off by the board of directors (or equivalent management body).
